Fuel consumption and CO₂ data applies to the German Market. The specified values are determined in accordance with certain test procedures. The specifications do not refer to an individual vehicle but serve only as a basis for comparing the different types of vehicles. In addition, the consumption figures achieved during normal driving may differ from the test values, depending in particular on special equipment fitted, vehicle loading, personal driving style, road and traffic conditions, environmental factors and the condition of the car.

*RRP: Recommended Retail Price - Including VAT & CO₂ emissions tax
